California law requires that operators of websites and online services disclose how they respond to a Do Not Track signal and whether other third parties may collect personally identifiable information about an individual's online activities from their site or service.

Some browsers have incorporated "Do Not Track" features. Most of these features, when turned on, send a signal or preference to the website or online service that a user visits, indicating that the user does not wish to be tracked. Because there is not yet a common understanding of how to interpret Do Not Track signals, Sustainable Energy Management

Systems does not currently respond to Do Not Track signal. We continue to work with the online industry to define a common understanding of how to treat Do Not Track signals. However, in the meantime, if you do want your use of the Sustainable Energy Management Systems Service not to be tracked so that we can send you targeted advertisements, please contact us as indicated in the "Contact Us" section below.
